

JOINTLY **CREATING**
THE FUTURE

Dear friends and partners!

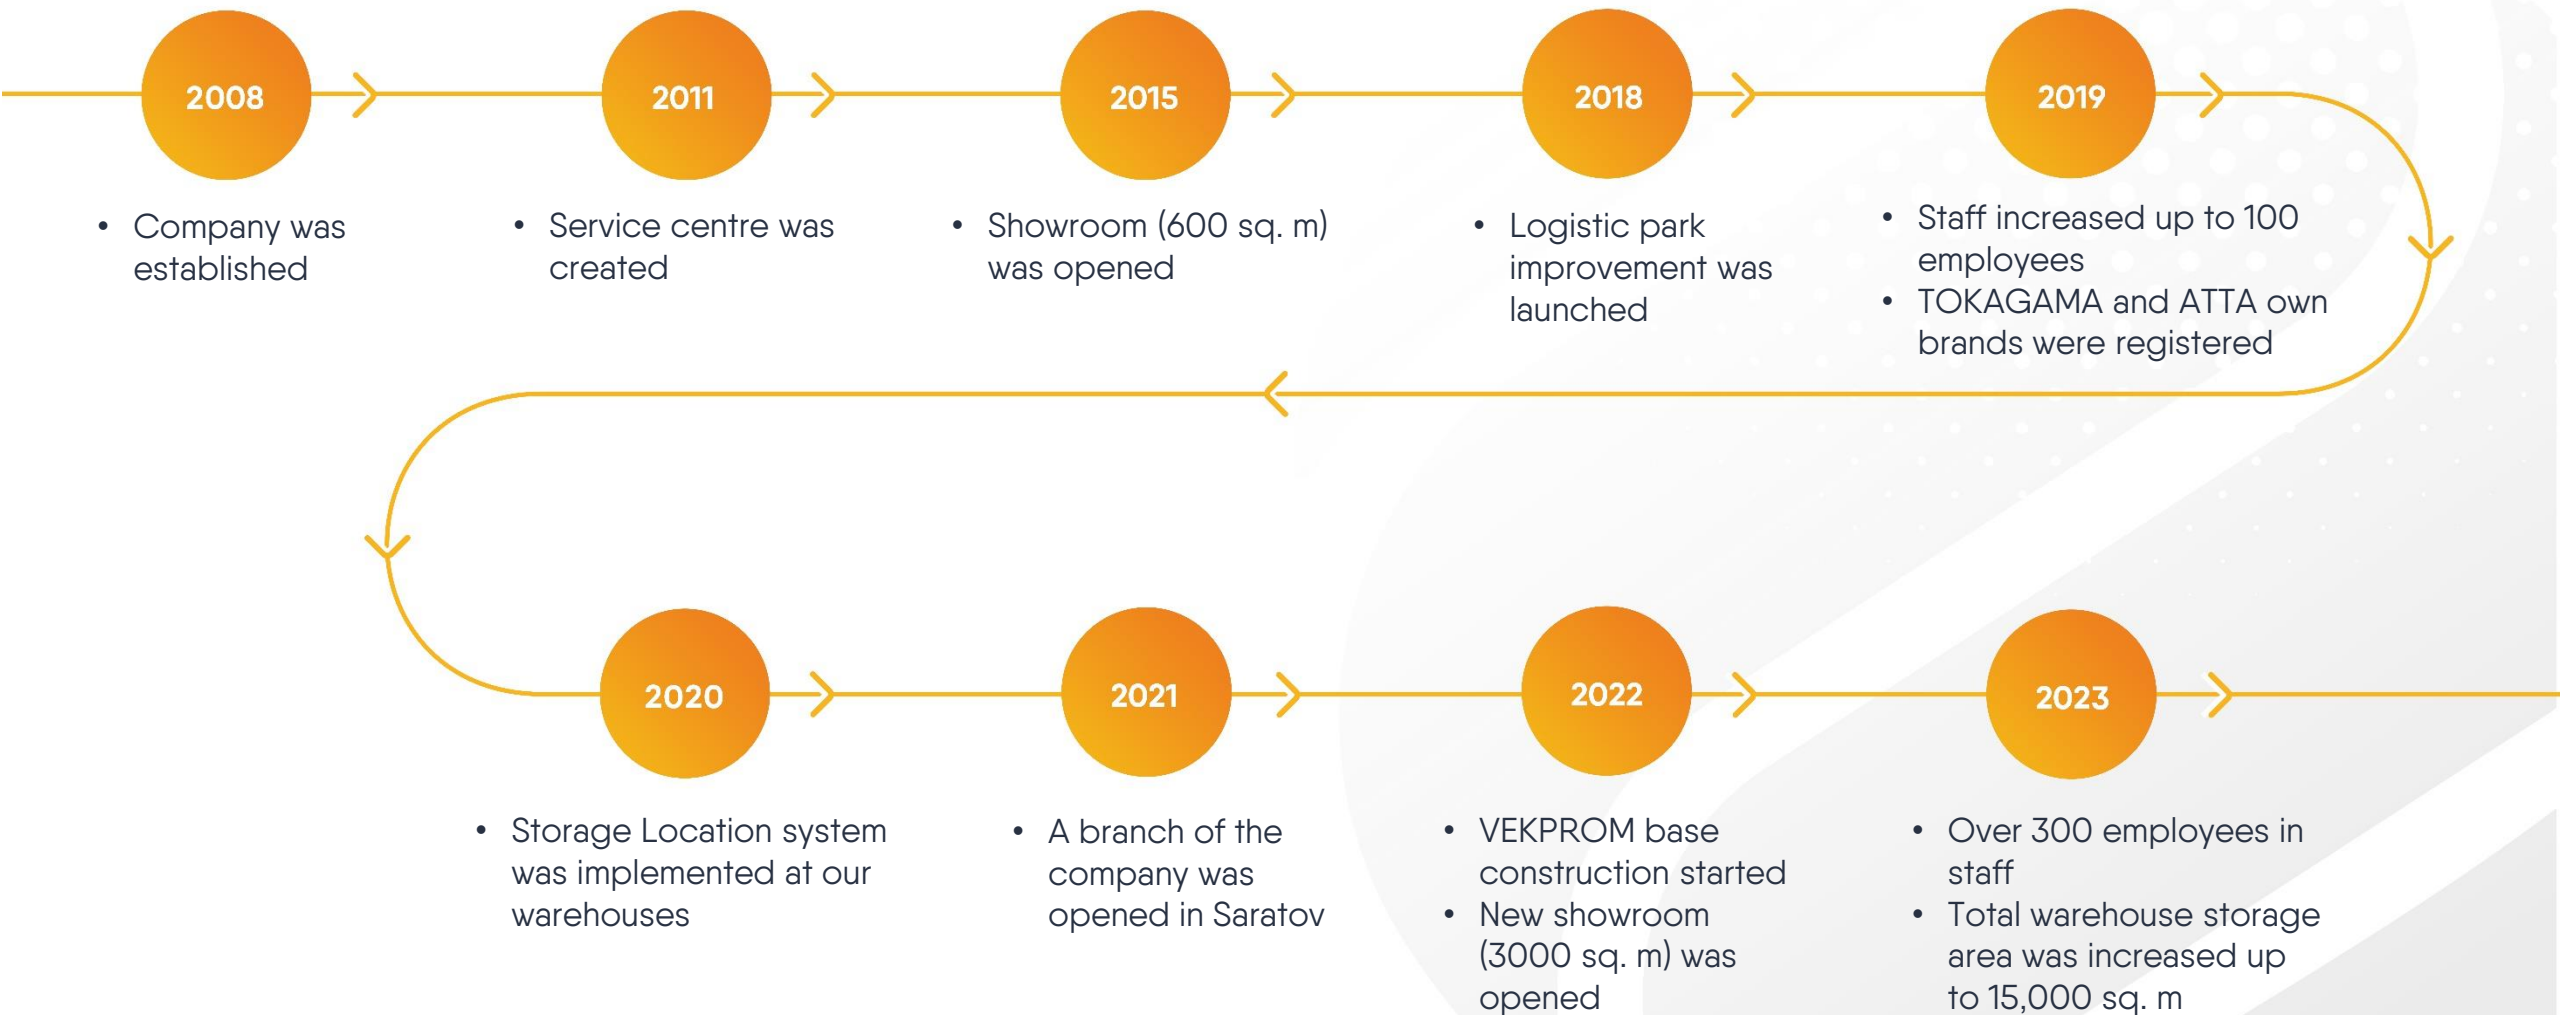

The history of the VEKPROM Industrial Group is closely related to the process of **revival of domestic machine tool engineering**. Over fifteen years, the VEKPROM team contributes its knowledge and experience into the development of the Russian industry. Based on professionalism of our personnel, diligently developing our own competences and skills, selectively and skilfully using the best practices of Russian and foreign partners, we passed through uneasy way from supplies of portable equipment to solving the highly sophisticated tasks in implementation of the cutting-edge industrial technologies. Every year VEKPROM takes part in largest international industry exhibitions to expand the range of supplied equipment.

We offer more than **50,000** SKUs of high-tech equipment, tools and accessories to our customers, as well as highly-skilled service support and wide range of solutions to modernize and automate the production processes at industrial enterprises. The client-oriented approach and raising the level of our service in line with the world standards are set to be the priorities in development of VEKPROM's corporate culture.

Our goal is to strengthen the technological and **industrial sovereignty of Russia** through our joint efforts!

Sincerely yours, the General director of PG-VEKPROM LLC,
Vadim Frolov

company milestones

we are the Russian company

Company strategy:

Striving to maximum increase of labour productivity and production effectiveness for our partners by providing the highest-quality products and solutions.

The company is listed in the Register of Reliable Partners by the Chamber of Commerce and Industry of the Russian Federation

our values

CUSTOMER FOCUSED

The client is the object and the sense of our daily work!

STRIVING UPWARD

We set high goals and achieve them by striving upward and by being passionate for our business.

FELLOWSHIP

We are united by the common goals, and we support each other.

NEGOTIABILITY

The atmosphere of good will and negotiability has been created in our team for discussion of problems and ways to improve production processes.

RELIABILITY

We guarantee the high-quality service at all stages of cooperation, starting from the process of selection of equipment and technologies.

corporate culture

We are the team of like-minded persons that keeps on developing continuously and always open for new ideas.

In our work, we are committed to the following: negotiability, integrity, mutual assistance. Our team is friendly and active, we are fond of our business and care about the result, we keep improving the quality of our teamwork, and we are always ready to support any colleague.

average experience of work in
the company of an employee is
5 years

average age of personnel is
37 years

the company implements
mentorship system

service centre

Offering commissioning works, maintenance and repair of any complexity

Technologies R&D, equipment selection assistance, proper technologies turnkey implementation

Specialists

Training and service are provided by engineers and certified manufacturers of equipment

Warehouse

Total storage area of 15,000 sq. m, 2,000 SKUs of spare parts in stock

Technical support

We offer long lasting support to our customers

Demonstration in operation

Demonstrations can be performed either in our 3,000 sq. m showroom or at our customers' workshops

Training

We do trainings for technicians of our customers

engineering

AUDIT

- Technological audit of production
